Program (EHS) - HDFS - Infant Mental Health (GCRT) - 516

Program Mission Statement: The HDFS Graduate Certificate in Infant Mental Health integrates research, theory and practical application of Infant Mental Health principles. Infant Mental Health is defined as “the developing capacity from birth to three to experience, regulate and express emotions; to form close relationships; and to explore the environment and learn — all in the context of family, community and cultural expectations for young children.” Coursework addresses these concepts from a developmental and attachment-based perspective and emphasizes reflective practice.
