Program Plan and Findings: Four Column Layout

Program (CEAT) - ECE - Electrical Engineering (BSEE) - 071

Program Mission Statement: The mission of the School of Electrical and Computer Engineering is to provide a high-quality, comprehensive electrical and computer engineering education for both undergraduate and graduate degree seeking students. The primary forms of educational delivery are classroom instruction, laboratory experiences utilizing both hardware and software technologies, and research experiences. To this end, the School offers the following degrees: Bachelor of Science in Electrical Engineering (BSEE), Bachelor of Science in Computer Engineering (BSCpE), Master of Science in Electrical Engineering (MSEE), Master of Engineering in Electrical Engineering (MEngEE), and Doctorate in Electrical Engineering (PhDEE).

The School is chartered to perform both basic and applied research in the broad areas of electrical and computer engineering. The School acquires external support to establish research enterprises for student-centric discovery that culminates in the publication of findings in international, peer-reviewed journals and conference proceedings of the highest reputation.

Ancillary to the teaching and research mission of the School, the faculty of the School engage in extramural activities of service, extension, and outreach by serving the School, College, or University on internal committees, organizing conferences, developing short courses, reviewing papers, participating on professional committees, and the like.

Program Information

2019 - 2020

Program Information Assessment Coordinator's Name: Keith A. Teague, Professor Assessment Coordinator's E-mail Address: keith.teague@okstate.edu Number of Students Enrolled in the Program: 255 Total Number of Students Graduated: 56 Number of Student Graduates from Stillwater Campus: 56 Were university assessment funds used by the department/program for assessment activities?: No If yes, describe how funds were used and the contribution the funds had on the assessment process: n/a Number of Student Graduates from Tulsa Campus: 0

Annual Executive Summaries

2019 - 2020

Program Assessment Coordinator: Keith A. Teague, Professor <u>Plan Review and Approval</u> Date Current Plan Was Reviewed and Approved: 09/15/2020

Date of Future Plan Review and Approval: 09/15/2025

Summary of Assessment Findings

Describe overall assessment findings and faculty members' interpretation of the assessment results: Overall results suggest the BS degree students in Electrical Engineering and Computer Engineering are meeting or exceeding our expectations for Student Outcomes.

This was the second full year for our new Student Outcomes specified by our accrediting agency, ABET, Inc., which changed from eleven outcomes that were previously in effect for approximately 19 years to a new set of seven outcomes. 2019-20 was the first year for which the new outcomes were fully in effect for an entire academic year. Although the new outcomes overlap the old ones in many cases, changes in wording and requirements have altered our assessment methods during the past two years. These methods continue to evolve as we gather data and experience.

Dissemination of Findings

Describe the individual(s) or committee responsible for reviewing and interpreting assessment data: Assessment data for the two undergraduate programs, Electrical Engineering and Computer Engineering, are collected, reviewed, and acted upon by the ECE Undergraduate Program and Assessment Committee, which is responsible for oversight of the BS degree programs in the School of Electrical and Computer Engineering. From a practical perspective, data are initially reviewed by the committee chair, Dr. Keith Teague, and the School Head, Dr. Jeffrey L. Young. The overall committee is brought in when important decisions need to be made. Data are reported to the overall faculty of the School typically twice yearly at a scheduled faculty meeting. When action is deemed necessary, a recommendation is generated to the School Head who in consultation with the faculty is ultimately responsible for further evaluation and possible action. Assessment data are reported to ABET, Inc., as part of our activities every six years in conjunction with our program reaccreditation.

Describe the process for sharing and discussing assessment findings with program faculty: Assessment information is shared with the faculty typically twice annually as part of regularly scheduled faculty meetings and/or the annual fall faculty retreat. The faculty are asked to review and approve the information presented. Annual review of the Program Educational Objectives and Student Outcomes is also performed.

Program Improvements Based on Assessment

Based on data collected this year, what changes are being considered or planned for the program?: No changes are anticipated during the 2020-21 academic year for Electrical Engineering or Computer Engineering.

During the previous year we continued refining the new Electric Circuits course, ECEN2714, and replaced PHYS3313 with a new course ECEN3903, Semiconductor Physics, that is being taught by ECE faculty members. A clinical faculty member became fully onboard to teach and manage the Capstone Design sequence, ECEN4013 and ECEN4024 with more consistency and rigor. Additional changes were made in course sequencing in the sophomore and junior years. A new course, ENSC2611, Electrical Fabrication Lab was added to provide experience in this important area. The CEAT Professional School concept was eliminated in ECE to support smoother progression of students through the curriculum.

As a result of feedback from our constituencies, discussion has begun regarding adding a degree option in Software Engineering

Based on this year's findings, what (if any) changes are planned for the assessment process?: No changes are anticipated for the assessment process during the 2020-21 academic year, other than continued refinement and improvement of our assessment of student outcome #4 related to ethics and professionalism. Our assessment in this particular area is relatively young and developing, while the rest of the assessment process is well developed and implemented.

Describe the process for implementing these changes/planned program improvements: n/a

Program Improvements Made in the Last Year: Course Improvements, Curriculum Improvements, Assessment Measure Improvements "Other" Improvements:

Goals for the Coming Year: Our next accreditation visit is scheduled during fall 2021. Our primary goals are to collect one more

complete set of high quality data over the full set of student outcomes, and to complete additional refinement of the assessment and accompanying continuous improvement process where needed. Discussion will continue regarding a new option in Software Engineering.

Is this Summary Report Complete?: Yes

List all individuals associated with this report preparation: Keith A. Teague, Professor; Jeffrey L. Young, Professor and Head

Outcomes	Assessment Methods	Findings	Use of Findings (Actions)
ABET1: Identify, Formulate and Solve Problems - An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics Outcome Status: Active Planned Assessment Year: 2017 - 2018, 2018 - 2019, 2019 - 2020, 2020 - 2021, 2021 - 2022, 2022 - 2023, 2023 - 2024 Start Date: Archived Date: Outcome Type: Skills Reason for Archival:	Project Proposal (ECE) / Concept Design Review (interdisciplinary) * Learning Outcome	 Reporting Period: 2019 - 2020 Conclusion: 2 - Meets Minimum Program Expectations (Developing) Student performance was assessed at 68% and 79%, averaging 74%, which exceeds the minimum expected threshold of 70%. Assessment was performed by the course instructor and faculty project advisors during the class project proposal / concept design review in week 3 of the semester. No action is required. (09/15/2020) Number of Students Assessed: 60 Number of Successful Students: 60 How were students selected to participate in the assessment of this outcome?: Students enrolled in the ECE Capstone class, ECEN4024, and ECE students in the CEAT interdisciplinary design class participated. The number of students assessed is approximate. What do the findings suggest about student achievement of this learning outcome?: Performance marginally exceeds expectations. This outcome will be reassessed at the conclusion of the Capstone project in the interest of observing change/improvement over the course of the semester. Any action will be based on the end of semester assessment. 	
	Capstone Assignment - Final Team Project Oral Presentation * Learning Outcome Goal/Benchmark: Minimum 70% average across all student teams Timeline for Assessment: Semester Other Assessment Type:	Reporting Period: 2019 - 2020 Conclusion: 4 - Exceeds Program Expectations (Advanced) Performance exceeds expectations. Student assessment measured 89.5% and 92% for the fall 2019 and spring 2020 semesters, respectively, averaging 91%. Evaluation was performed by the course instructor and faculty advisors during the final team project oral presentation. This is well above the expected performance threshold of 70%. This assessment was administered at the end of the course in comparison to the Capstone Project Proposal/Concept Design Review, which was administered at the beginning. A significant improvement is noted. (09/15/2020) Number of Students Assessed: 60 Number of Successful Students: 60 How were students selected to participate in the assessment of this outcome?: Students in the ECE Capstone course ECEN4024 as well as ECE students in the

* Learning Outcome

Goal/Benchmark: Minimum 70% average across all student teams

Timeline for Assessment: Semester

Outcomes	Assessment Methods	Findings	Use of Findings (Actions)
	Other Assessment Type: Analysis of Written Artifacts - Capstone Final Project Report * Learning Outcome Goal/Benchmark: Minimum 70% across all student teams. Timeline for Assessment: Semester Other Assessment Type:		
ABET4: Ethics and Professionalism - An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts Outcome Status: Active Planned Assessment Year: 2017 - 2018, 2019 - 2020, 2020 - 2021, 2021 - 2022, 2022 - 2023, 2023 - 2024 Start Date: Archived Date: Outcome Type: Knowledge Reason for Archival:	Project & Assignments - Ethics Activity in ECEN4013, Design of Engineering Systems * Learning Outcome Goal/Benchmark: 70% minimum average over all students Timeline for Assessment: Semester Other Assessment Type:	 Reporting Period: 2019 - 2020 Conclusion: 2 - Meets Minimum Program Expectations (Developing) Approximately 28 students in ECEN4013, Design of Engineering Systems, completed a short ethics writing assignment during spring 2020. This represents a new assessment in this class. The submitted papers were reviewed but they were not graded and the assessment did not become part of their final grade. The results were judged to be satisfactory and the assessment will be refined for use in future semesters. No additional action is required at this time. (09/15/2020) Number of Students Assessed: 28 Number of Successful Students: 28 How were students selected to participate in the assessment of this outcome?: Students in ECEN4013, Design of Engineering Systems, participated in the assessment activity. The number of students assessed is approximate. What do the findings suggest about student achievement of this learning outcome?: The outcome was marginally met. Additional refinement of the assessment instrument is needed. 	Use of Findings (Actions): Future performance will be tracked to determine if action is needed. (09/15/2020)
	Project & Assignments - Probability, Statistics and Ethics/Professionalism Assignment * Learning Outcome Goal/Benchmark: 70% minimum average over all students Timeline for Assessment: Other Assessment Type:	Reporting Period: 2019 - 2020 Conclusion: 2 - Meets Minimum Program Expectations (Developing) During fall 2019 students were asked to view three videos illustrating how statistics can be used to "lie", followed by a brief analysis of the case study "Trimming Data". This was the first use of this assessment and the results were reviewed but not graded. The activity will be further refined for future semesters. Performance was satisfactory.	Use of Findings (Actions): Future performance will be tracked to determine if action is needed. (09/15/2020)

Outcomes	Assessment Methods	Findings	Use of Findings (Actions)
		During the spring semester a problem was administered by the instructor dealing with "ethical use of statistics" related to medical testing, referenced to the current COVID-19 worldwide pandemic. Performance on this single case student was unsatisfactory, averaging 48.4%. This low result is likely due to two factors. First, the problem was not the same as examples in class requiring the students to stretch their knowledge, and second we are still developing experience in how to properly assess this outcome. More work is needed in this area. (09/15/2020) Number of Students Assessed: 64 Number of Successful Students: 64 How were students selected to participate in the assessment of this outcome?: Students in ECEN4503, Random Variables, participated in the activity. The number of students assessed is approximate. What do the findings suggest about student achievement of this learning outcome?: The outcome is met marginally, but additional development of the assessment instruments is needed.	
ABET5: Teamwork - An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives Outcome Status: Active Planned Assessment Year: 2017 - 2018, 2018 - 2019, 2019 - 2020, 2020 - 2021, 2021 - 2022, 2022 - 2023, 2023 - 2024 Start Date: Archived Date: Outcome Type: Skills Reason for Archival:	Capstone Assignment - Capstone Project Proposal (ECE) / Concept Design Review (interdisciplinary) * Learning Outcome Goal/Benchmark: Minimum 70% average over all student teams Timeline for Assessment: Semester Other Assessment Type:	Reporting Period: 2019 - 2020 Conclusion: 2 - Meets Minimum Program Expectations (Developing) The average performance for fall 2019 and spring 2020 is 71.6% and 69.1%, respectively, for an average of 70.4% on this assessment performed by the Capstone course instructor and faculty advisors. Performance is typical for this assessment at the beginning of the Capstone course. This outcome is reassessed at the end of the Capstone course to judge final performance. No action is required at this time. (09/15/2020) Number of Students Assessed: 60 Number of Successful Students: 60 How were students selected to participate in the assessment of this outcome?: Students in the ECE Capstone course ECEN4024 and ECE students in the CEAT Capstone course participated in the assessment. The number of students assessed is approximate.	

Outcomes	Assessment Methods	Findings	Use of Findings (Actions)
		What do the findings suggest about student achievement of this learning outcome?: Minimum performance is marginally met. This outcome will be reassessed at the conclusion of the Capstone course to judge final performance.

Reporting Period: 2019 - 2020

Findings

Conclusion: 2 - Meets Minimum Program Expectations (Developing)

The averages for fall 2019 and spring 2020 were 67.5% and 80.0%, respectively, for an average of 73.8% on this assessment performed at the beginning of the Capstone course by the course instructor and faculty advisors during the capstone project proposal / concept design review. These results are typically near the minimum performance threshold of 70% for students assessed at the beginning of the Capstone course. A second assessment will be performed at the conclusion of the Capstone course. No action is needed at this time.

(09/15/2020) Number of Students Assessed: 60

Number of Successful Students: 60

How were students selected to participate in the

assessment of this outcome?: Students in the ECE Capstone course ECEN4024 and ECE students in the CEAT Capstone course participated in the assessment. The number of students assessed is approximate.

What do the findings suggest about student achievement of this learning outcome?: The relatively low results are normal for this assessment performed at the beginning of the Capstone semester. This outcome will be reassessed at the end of the Capstone project when a significant improvement is expected.

Capstone Assignment - Final Team Reporting Period: 2019 - 2020

Project Oral Presentation Conclusion: 4 - Exceeds Program Expectations (Advanced) * Learning Outcome The performance averages for fall 2019 and spring 2020 Goal/Benchmark: Minimum 70% were 90.8% and 93.8%, respectively, for an average of average across all student teams 92.3%. This assessment was performed during the final Timeline for Assessment: Semester team project oral presentation at the end of the Capstone Other Assessment Type: course by the course instructor and faculty advisors and should be compared with the assessment performed at the beginning of the course, which is much lower as is expected. The result of this assessment easily surpasses the minimum performance level of 70%. No action is needed.
